

Getting Started with the Knowledge Hub

Preparing for School Inspection

Who is this resource for?

This resource is designed to support school leaders in preparing for inspection.

What is the purpose of this guide?

The Team Teach Knowledge Hub brings together a wide range of resources to support staff in different roles and this guide highlights a small selection of materials to get you started.

These resources are intended as a useful starting point rather than a complete list and include core materials to support you in your role and help guide your professional practice.

As you continue to explore the Knowledge Hub, you may wish to access and use additional resources that align with your current priorities.

As you use the guide, consider:

- Which resources feel most relevant to my role right now?
- Which ideas could I apply in my day-to-day practice?
- Where might I want to develop my knowledge further?
- Who could I share or discuss these resources with?
